Dungster LLC's support to EPA Grantees

Install the most composting capacity possible by leveraging these discounts!

Fairview PA – Dungster LLC supports all EPA grant applicants with this cost advantaged equipment proposal.

Dungster believes all composting methods and approaches are steps in the right direction. To leverage awarded funds so the maximum composting capacity can be implemented Dungster offers applicants/awardees two incentives to incorporate Dungster's in-vessel composting equipment into their plans.

1. For the first twenty-five **purchases** of Dungster equipment by grant awardees, Dungster will discount the aeration system **by 30%**.
2. For the first twenty-five **rentals** of Dungster equipment by awardees, Dungster will discount the first 12-months' rent **by 50%**.

Other conditions, to take advantage of this offer apply, inquire with Dungster LLC.

If unfamiliar with Dungster LLC's in-vessel composting method, it is worth outlining how Dungster's approach aligns perfectly with the EPA's objectives.

The EPA is looking to fund proposals for implementation-ready projects that can be expanded ASAP to achieve GHG emissions reductions quickly. Dungster LLC's technology leverages the omni-available common roll-off dumpsters to make them quickly into advanced in-vessel composters.

This presents an excellent opportunity for community composters! Dungster LLC equipped projects quickly reduce GHG emissions while providing additional benefits to the community—particularly addressing environmental injustice. These community composting projects are uniquely cost-effective and can be replicated and “scaled up” quickly across many districts.

Dungster LLC can even assist disadvantaged sites without electrical power with its solar powered composter.

DUNGSTER LLC: a supplier of affordable in-vessel composting equipment. Using a common and unmodified roll-off dumpster as its host, the Dungster aeration equipment ships by courier and is installed in minutes facilitating easy on-site composting.
